# The Video Games Sales Analysis using Tableau
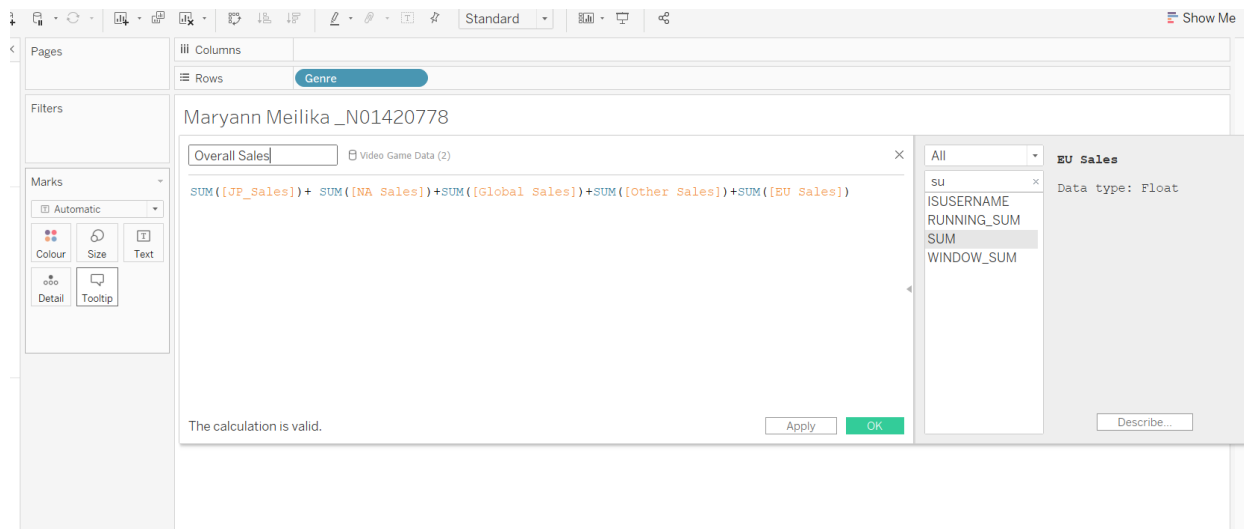

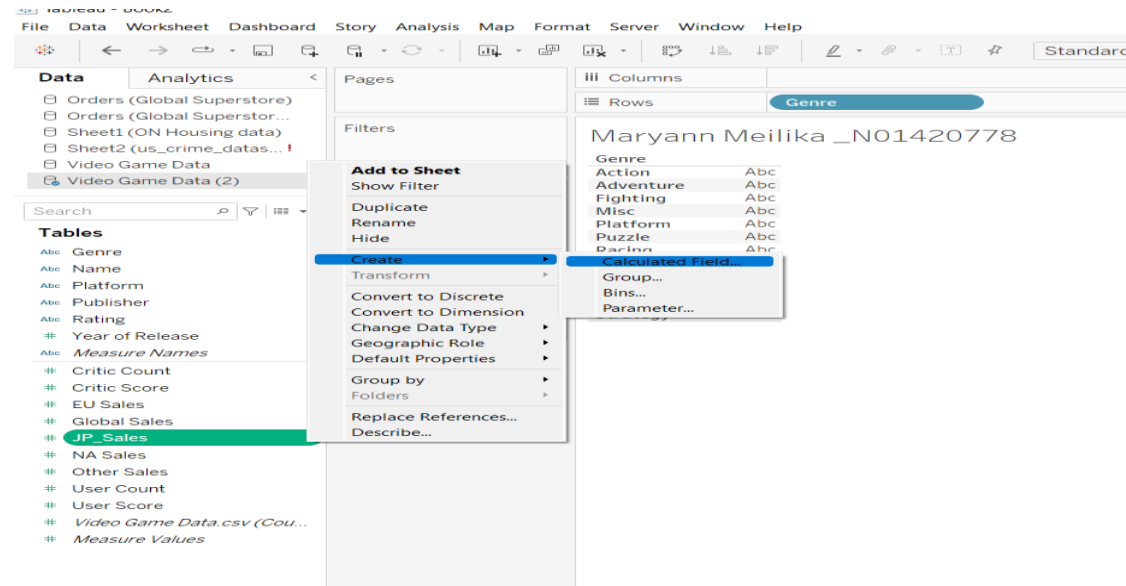

Maryann Meilika

1. Create a visualisation showing the Sales of EU, JP, NA, Global and Other plotted against Year of release.

2. Create a Donut chart showing Percentage of JP sales for different genres. Show the total JP sales in the middle of the donut.
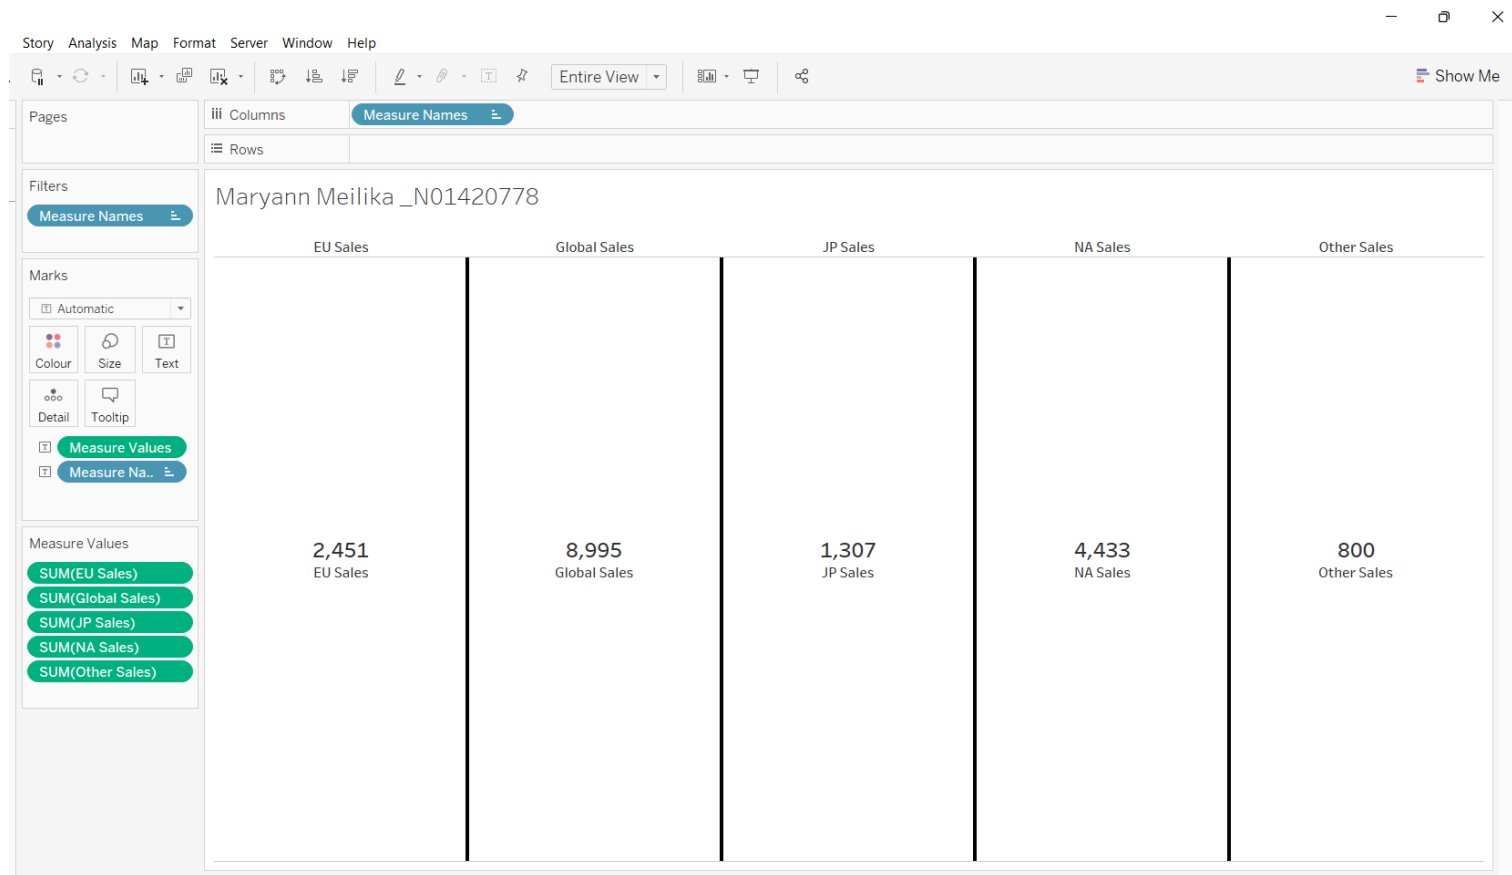

3. Create a calculated field that adds the Sales of EU, JP, NA, Global and Other. Use this calculated field to create the visualisation.
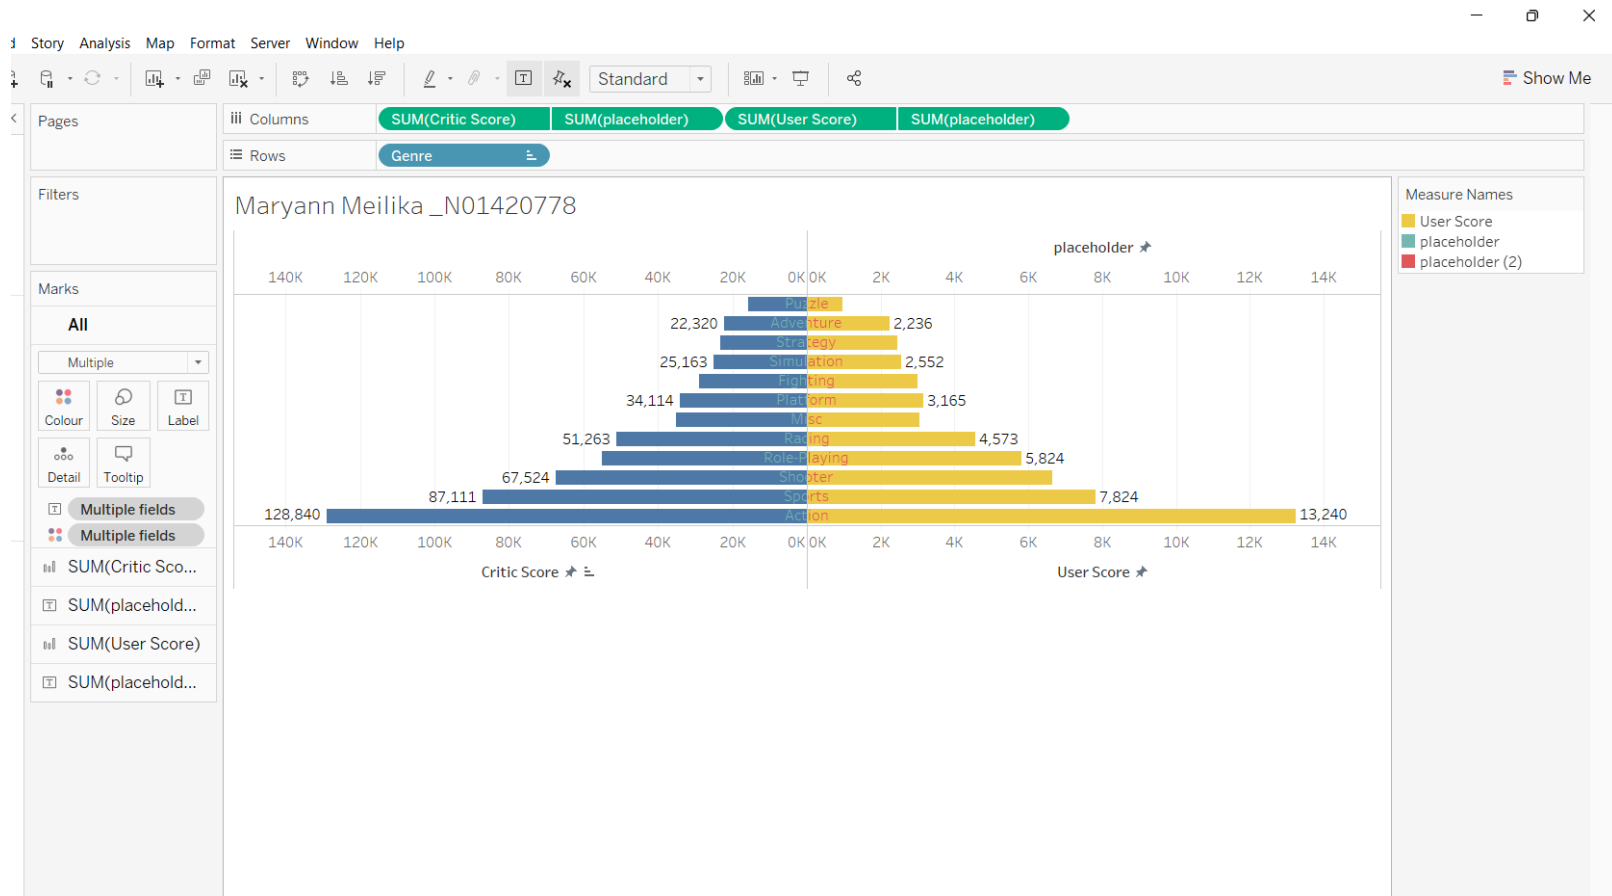

Then drag the overall sales in the columns and colours in the marks

4. Create the following visualisation showing the summary of various measures.

5. Create a butterfly chart to compare the User and Critic scores.

6. Create a Dashboard using all the sheets created above.
